

dictation-ez1 • User Guide

© Arvind AI Labs • Version 1.2.0 (Build 2026.10.21-R4) • <https://dictation-ez1.pages.dev>

1. Overview

dictation-ez1 transforms spoken thoughts into clean, polished text. Powered by Google Gemini AI, it automatically corrects grammar, punctuation, and capitalization across multiple languages. Polished text is **automatically copied to your clipboard** with a haptic buzz.

2. Mobile Setup (iPhone & Android)

- **iPhone (Safari):** Open <https://dictation-ez1.pages.dev> → Tap Share (square with arrow) → Tap **Add to Home Screen** → Name it dictation-ez1.
- **Android (Chrome):** Open <https://dictation-ez1.pages.dev> → Tap menu (■) → Tap **Install app** or **Add to Home screen**.

3. Desktop Setup (Windows & Mac)

- **Install PWA:** Open <https://dictation-ez1.pages.dev> in Chrome / Edge → Click the **Install app** icon in the address bar.
- **Taskbar / Spacebar:** Pin to your taskbar for 1-click launch. Press **Spacebar** to start/stop speaking.

4. Daily Usage & Modes

Mode	Description & Use Case
Prose	Smooth, clean paragraphs for standard communication.
Bullets	Turns spoken ideas into concise bulleted lists.
Journal 📅	Adds timestamp and date headers for daily notes & diaries.
Email	Formats thoughts into a formal email with greeting and sign-off.
Code	Preserves technical identifiers, syntax, and Markdown blocks.

5. Multilingual Scripts (English, Tamil, Hindi, Sanskrit, Grantha)

- **Auto-Detect:** Speaks English, Tamil, Hindi, Sanskrit, or code-mixed Tanglish/Hinglish with auto acoustic detection.
- **Tamil (Standard):** Standard Tamil Unicode script (தமிழ்).
- **Tamil Extended (Numbered Tamil):** Uses subscript numbers (௪௪, ௪௪, ௪௪, ௪௪ / ௪௪, ௪௪, ௪௪, ௪௪ / ௪௪, ௪௪, ௪௪, ௪௪ / ௪௪, ௪௪, ௪௪, ௪௪) for accurate Sanskrit/Vedic consonants.
- **Grantha:** Traditional South Indian script for Sanskrit chanting and Vedic stotras (𑌕𑌖𑌔𑌕𑌖𑌔𑌕𑌖𑌔𑌕𑌖𑌔 / ூ, ூ, ூ, ூ, ூ, ூ, ூ, ூ).
- **Devanagari:** Accurate Devanagari script for Hindi and Sanskrit with Sandhi and Visarga.
- **Roman Scripts Submenu:** **A English** (Standard Roman), **IAST** (Sanskrit Diacritics), and **Aa Phonetic** (Tanglish / Hinglish).
- **Translate to English:** Translates spoken non-English directly into fluent English.

6. Navigating Back & Pasting Instantly

- **iPhone (1-Swipe Gesture):** Swipe thumb right across the bottom **Home Bar** → slides right back to your target app → Tap **Paste**.
- **Desktop (Windows / Mac):** Press **Alt + Tab** (or Cmd + Tab) → press **Ctrl + V** (or Cmd + V).

7. iPhone Button Integration (Action Button / Back Tap)

In Apple Shortcuts app: Add Action → **URL** (<https://dictation-ez1.pages.dev>) → Add **Open URLs** → Name shortcut **dictation-ez1** → In iPhone Settings, map to Action Button or Back Tap.

8. Privacy & Zero Cloud Storage

API keys, custom vocabulary, and speech transcripts remain strictly in local device storage. No audio or text is ever logged on intermediate servers.
